EDUCATION	Ph.D. in Atmospheric and Oceanic Sciences, Princeton University 2020–2026 Doctoral advisor: Gabriel Vecchi Dissertation title: Perspectives on Ocean–Climate Interactions: Feedbacks, Variability, and Impacts on Infectious Disease Graduate Certificate: Science, Technology and Environmental Policy Teaching Transcript (McGraw Center for Teaching and Learning) B.A. in Earth and Planetary Sciences, Harvard University 2015–2019 <i>magna cum laude with highest honors</i> Thesis advisor: Peter Huybers Thesis title: Quantifying Isopycnal Heave Using Dynamic Depth Warping Secondary Field: Mathematical Sciences Language Citation: Mandarin Chinese
RESEARCH APPOINTMENTS	Postdoctoral Research Scientist 2026 <i>Columbia Climate School, Columbia University</i> Advisors: Jeffrey Shaman (Climate School, Mailman School) and Sen Pei (Mailman School) Investigating relationships between extreme weather, human mobility, and infectious disease, and potential influences of climate change. Postdoctoral Research Associate 2026 <i>High Meadows Environmental Institute, Princeton University</i> Advisors: Gabriel Vecchi (Geosciences), Lydia Lynch (Molecular Biology) Researching how extreme and moderate warm and cold temperatures impact physiology in mice and implications for climate change. Graduate Research Assistant 2020–2026 <i>Princeton University Program in Atmospheric and Oceanic Sciences</i> Advisor: Gabriel Vecchi Committee Members: Laure Resplandy, Andrew Wittenberg, Rong Zhang, Sonya Legg Investigated the ocean’s role in global climate, including how ocean circulation modulates climate feedbacks and stability under different solar forcing (paper) and how ocean salinity impacts the El Niño–Southern Oscillation (ENSO) using coupled general circulation models (GCMs). HMEI-STEP Fellow 2022–2024 <i>High Meadows Environmental Institute, Princeton School of Public and International Affairs</i> Advisors: Jessica Metcalf and Bryan Grenfell Fellowship for graduate students to take public policy courses and conduct a policy-relevant research project. Integrated climate and infectious disease modeling to study how ENSO impacts year-to-year variations in disease spread and population immunity (paper), and implications for public health policy. Undergraduate Research Assistant 2017–2019 <i>Harvard Department of Earth and Planetary Sciences</i> Advisor: Peter Huybers Developed a novel warping technique to identify ocean profiles influenced by water mass intrusions and improve estimates of global ocean heat content. Projected variability onto seasonal modes and the El Niño–Southern Oscillation to discern heating trends and interannual changes in ocean heat content.

Summer Student Fellow

Summer 2018

Woods Hole Oceanographic Institution

Advisors: Geoffrey Gebbie and Peter Huybers

Created a novel method to measure ocean heat uptake by adapting an algorithm commonly used for speech recognition (dynamic time warping).

Summer Undergraduate Research Fellow

Summer 2017

Scripps Institution of Oceanography

Advisors: Ivana Cerovecki, Matthew Mazloff, Sarah Gille, Lynne Talley

Characterized relationships between sea ice production and winds in West Antarctica and their connection to cooling and freshening events in the southeast Pacific. Compared model output to satellite and in-situ observations.

FELLOWSHIPS & GRANTS	High Meadows Environmental Institute Science, Technology, and Environmental Policy Graduate Fellowship (HMEI-STEP)	2022–2024
	National Science Foundation Graduate Research Fellowship (NSF GRFP)	2021–2024
	American Meteorological Society Graduate Fellowship	2020–2021
	Student Travel Grant , American Geophysical Union Fall Meeting	2018
	Woods Hole Oceanographic Institution Summer Student Fellowship	2018
	Student Travel Grant , Ocean Sciences Meeting	2018
	Scripps Institution of Oceanography SURF REU	2017
AWARDS & HONORS	GradFUTURES Clio Hall Award , Princeton University	2026
	In recognition of significant contributions to the professional development of Princeton graduate students.	
	First Place, Health in Climate Hackathon , Climate Week NYC, Cornell Tech	2025
	Created an interactive AI agent that sends actionable weather and health alerts via text message before, during, and after extreme weather events.	
	Outstanding Student Presentation Award , American Geophysical Union	2025
	Service and Outreach Award , Princeton Geosciences Department	2022
	magna cum laude with highest honors	2019
UNIVERSITY TEACHING & LEADERSHIP	Highest honors for research within the field of Earth and Planetary Sciences at Harvard College.	
	Thomas T. Hoopes Prize	2019
	Awarded to Harvard seniors nominated by faculty for conducting outstanding senior thesis research.	
	<i>ENV 480/GEO 480/CEE 480: Tropical Cyclones and Associated Impacts</i>	Spring 2026
	Guest Lecturer , Princeton University	
	Professors: Gabriel Vecchi, Gabriele Villarini	
	Guest lecture on climate, weather and infectious disease for undergraduates and graduate students.	
	<i>ENV 354/GEO 368: Climate and Weather: Order in the Chaos</i>	Fall 2025
	Guest Lecturer , Princeton University	
	Professor: Gabriel Vecchi	
	Guest lecture on the El Niño–Southern Oscillation for undergraduates.	
	<i>SPI 586D: Global Environmental Governance</i>	Spring 2024, 2025
	Guest Lecturer , Princeton University and NYU School of Law	
	Professors: Michael Oppenheimer, Bryce Rudyk	
	Guest lecture on solar radiation management, climate modeling, and international governance strategies for geoengineering.	
	Professional Development Associate , GradFUTURES, Princeton University	2024–25
	Supported science policy career pathways and professional development opportunities for Princeton graduate students. Co-organized the inaugural science policy learning cohort, science communication workshop, and evaluated AAAS CASE workshop applications.	
	Advisor , High Meadows Environmental Institute Summer Internship, Princeton University	2024–25
	Advised undergraduate researcher Emma Dornseif during the summer and senior thesis project on extreme temperature and mortality, joint with the Department of Anthropology.	
	<i>GEO 425 / MAE 425: Introduction to Ocean Physics for Climate</i>	Fall 2022
	Assistant in Instruction & Guest Lecturer , Princeton University	
	Professor: Gabriel Vecchi	
	Guest lectures (5): Surface heat fluxes / ocean heat budget, mixed layer dynamics, deep ocean circulation and global overturning climate impacts, ENSO observations, ENSO theory.	

	<i>USW 35: Dilemmas of Equity and Excellence in American K-12 Education</i> Fall 2018 Course Assistant, Harvard College Program in General Education Professor: Katherine (Kay) Merseth Topics: US public education history, current issues, and reform.
	<i>APMTH 120: Applied Linear Algebra and Big Data</i> Spring 2018 Teaching Fellow, Harvard School of Engineering & Applied Sciences Professor: Eli Tziperman Topics: singular value decomposition, spectral clustering, neural networks, applications to economics & science.
OTHER TEACHING EXPERIENCE	AmeriCorps Member 2019–2020 <i>City Year Boston, Henry Grew Elementary School</i> Provided holistic support and tracked student data in a 5th grade classroom, including individual and small-group tutoring in math and English language arts, social-emotional coaching, after-school enrichment, and school-wide programming. Freelance Tutor 2019–2020 Tutored high school students, undergraduates, and adult learners. Subjects: Earth Science, Chinese, MATLAB, college essay writing, SAT prep. Science Teacher Summer 2019 <i>Children’s School of Science, Woods Hole, MA</i> Designed curricula and taught hands-on, field-based summer courses for students ages 8-12. Courses: Marine Biology, Invertebrate Zoology. Peer Tutor 2016–2019 <i>Harvard College Bureau of Study Counsel</i> Tutored 11 undergraduates in linear algebra, multivariable calculus, statistics, probability, Chinese, and American Sign Language.
CONFERENCE TALKS	M. V. Chung, W. Yang, G. A. Vecchi, B. Grenfell, and C. J. Metcalf, 2025: “Intersecting Memories of Immunity and Climate: Potential Multiyear and Nonlinear Impacts of the El Niño–Southern Oscillation on Infectious Disease Spread.” <i>American Geophysical Union Fall Meeting</i>, New Orleans, LA. (invited) M. V. Chung, 2024: “Infectious Disease Dynamics in a Changing Climate.” <i>Detection and Attribution Science Workshop</i>, University of the West Indies, Mona, Kingston, Jamaica. M. V. Chung, W. Yang, and G. A. Vecchi, 2023: “Abrupt Solar Changes Yield Asymmetric Responses in Deep Water Density and Meridional Overturning Circulation.” <i>American Geophysical Union Fall Meeting</i>, San Francisco, CA. M. V. Chung, W. Yang, G. A. Vecchi, B. Grenfell, and C. J. Metcalf, 2023: “Multiyear Impacts of ENSO on Infectious Disease Spread in Weather-Disease Models.” <i>American Geophysical Union Fall Meeting</i>, San Francisco, CA. M. V. Chung, M. Liu, B. Soden, and G. A. Vecchi, 2023: “The influence of sea surface salinity variability on the equatorial Pacific mean state and extreme ENSO events.” <i>Northeast Tropical Workshop</i>, University at Albany, Albany, NY. M. V. Chung, M. Liu, B. Soden, and G. A. Vecchi, 2022: “The Role of Sea Surface Salinity in Extreme El Niño events.” <i>Ocean Salinity Conference</i>, Columbia University, New York, NY. M. V. Chung, M. Liu, B. Soden, and G. A. Vecchi, 2021: “The Role of Sea Surface Salinity in Extreme El Niño events.” <i>American Geophysical Union Fall Meeting</i>, New Orleans, LA.
OTHER FORMAL TALKS	(invited) M. V. Chung, W. Yang, G. A. Vecchi, 2025: “Runaway Cooling from Large Solar Reductions Modulated by Ocean Overturning Circulation and Heat Uptake.” <i>45th ECS & Cloud Feedback Virtual</i>

Symposium. https://youtu.be/YJK-MvE-Pys?si=_X09i8-RqB4484r9&t=550

(invited) **M. V. Chung**, 2024: “ENSO forecasting and implications for infectious disease prediction.” *On the accuracy (and niceness) of prediction: From epidemics to climate and weather*, High Meadows Environmental Institute and Department of Ecology and Evolutionary Biology, Princeton, NJ.

M. V. Chung, W. Yang, G. A. Vecchi, B. Grenfell, and C. J. Metcalf, 2023: “Multiyear Impacts of ENSO on Infectious Disease Spread in Weather-Disease Models.” *STEP Seminar*, School for Public and International Affairs, Princeton, NJ.

M. V. Chung, 2023: “Climate Science at the IPCC: How Research Informs Policy.” *John Locke Institute Public Policy Symposium*, Princeton, NJ.

M. V. Chung, 2019: “Down with Density: A New Way to Quantify Ocean Warming due to Climate Change.” *Harvard College 3-Minute Thesis Finalist Presentations*, Harvard College Writing Center, Cambridge, MA.

M. V. Chung, G. Gebbie, and P. Huybers, 2019: “Quantifying Isopycnal Heave Using Dynamic Depth Warping.” *2019 Senior Thesis Presentations*, Harvard University Department of Earth and Planetary Sciences, Cambridge, MA.

M. V. Chung, G. Gebbie, and P. Huybers, 2018: “Quantifying Layer Thickness Changes Using Dynamic Depth Warping.” *Summer Student Fellow Presentations*, Woods Hole Oceanographic Institution Physical Oceanography Department, Woods Hole, MA.

POSTER
PRESENTATIONS

M. V. Chung, W. Yang, G. A. Vecchi, 2025: "Runaway cooling from large solar reductions modulated by ocean overturning circulation and heat uptake." *American Geophysical Union Fall Meeting*, New Orleans, LA.

(Award) **M. V. Chung**, W. Yang, G. A. Vecchi, B. Grenfell, and C. J. Metcalf, 2024: “Intersecting memories of immunity and climate: Potential multiyear impacts of the El Niño—Southern Oscillation on infectious disease spread.” *American Geophysical Union Fall Meeting*, Washington, D.C.

M. V. Chung, W. Yang, G. A. Vecchi, B. Grenfell, and C. J. Metcalf, 2024: “Intersecting memories of immunity and climate: Potential multiyear impacts of the El Niño—Southern Oscillation on infectious disease spread.” *HMEI Discovery Day*, Princeton, NJ.

(invited) **M. V. Chung**, M. Liu, B. Soden, and G. A. Vecchi, 2023: “The Influence of Sea Surface Salinity on the Equatorial Pacific Mean State and Extreme ENSO Events.” *American Geophysical Union Fall Meeting*, San Francisco, CA.

M. V. Chung, M. Liu, B. Soden, and G. A. Vecchi, 2022: “The Influence of Sea Surface Salinity on the Equatorial Pacific Mean State and Extreme ENSO Events.” *American Geophysical Union Fall Meeting*, Chicago, IL.

M. V. Chung, G. Gebbie, and P. Huybers, 2020: “Quantifying Ocean Heat Content Changes Related to ENSO, Seasonal Variability, and Trends in Isopycnal Heave.” *Ocean Sciences Meeting*, San Diego, CA.

M. V. Chung, G. Gebbie, and P. Huybers, 2018: “Quantifying Isopycnal Heave Using Dynamic Depth Warping.” *American Geophysical Union Fall Meeting*, Washington, D. C.

M. V. Chung, I. Cerovecki, F. A. Haumann, M. Mazloff, S. Gille, and L. Talley, 2018: “Variability of Sea Ice Production in the Ross Sea from 2006-2010 and its Relationship to the Amundsen Sea Low.” *Ocean Sciences Meeting*, Portland, OR.

M. V. Chung, I. Cerovecki, M. Mazloff, S. Gille, and L. Talley, 2018: “Variability of Ice Production in the Ross Sea in 2006-2010 and its Relationship to the Amundsen Sea Low.” *SURF Research Symposium*, Scripps Institution of Oceanography, La Jolla, CA.
